ROOFING & MAINTENANCE LTD

## **PERMATORCH 4.5**

**Permatorch 4.5 is a next generation range of high performance modified, torch applied roofing cap sheets.**

These products combine the qualities of a specially formulated high softening point modified bitumen coating with a tough high tensile strength polyester base, providing optimum handling characteristics and long term durability, making it the best all-round performing torch-on in its class. The membranes can be used for both new work and refurbishment projects, and can be supplied with up to a 15-year guarantee.

Permatorch 4.5 can be used with IKO Glass Universal Underlay, or other Universal Torch Underlays, depending on the specification and system performance required.

- 4.5mm slate surfaced cap sheets
- Range of attractive slate finishes (Green, Black and Brown)
- High softening point coating for summer application
- Heavy weight polyester base
- Strong and flexible
- Low temperature flexibility -15°C for winter application
- Long-term durable performance
- 15 year guarantee (system dependant)
- Excellent year round performance characteristics
